

ascellon®

THE SURE MEASURE OF EXCELLENCE

COMPANY OVERVIEW

Founded in 1996, Ascillon Corporation specializes in program management, studies, evaluations and IT software and systems that enable Government customers to achieve excellence in performance, compliance and accountability. From healthcare and Medicare or Medicaid issues, to grants management, to medical records review and analysis, to healthcare IT and data analysis, Ascillon has the expertise and experience to work effectively with our customers to accomplish their missions. Ascillon is able to fast-track projects, reduce risk and apply best practices so customers can see excellent results, faster. In addition, we apply independently validated quality management system, ISO 9001:2008 to all projects which assures that our customers achieve consistent quality results, cost-efficiency and deliverables within predictable timeframes.

DIFFERENTIATORS

- Quality Management System ISO 9001:2008 Registered
- CMMI Level 2 Practices
- Healthcare Monitoring and Assurance Practices
- Professional and Clinical Staff (PhD. MBA. MPH. MD. RN. etc.)

SUCCESS STORIES

- Since 2003, Ascillon has assisted the federal government in the monitoring and oversight of healthcare facilities nationwide by providing **program management; survey design and implementation; data collection and analysis;** and detailed reporting. Ascillon has completed over 4,850 surveys and currently evaluates healthcare facilities' quality of care for both the Centers for Medicare and Medicaid Service (CMS) and the Department of Veteran Affairs (VA).
- Ascillon conducts independent **medical record reviews** for the Centers for Medicare and Medicaid Services (CMS) in accordance with the ICD-9 guidelines as well as Medicare and Medicaid rules and regulations. Findings are submitted to CMS for use in determining appropriate payments and calculating **payment error rates**. Over the past 2 years, Ascillon has identified over \$3 billion in potential savings to Medicare.
- For over 18 years, Ascillon has provided **design; development; administration;** and troubleshooting on web-based and client-server software applications across multiple computing platforms that support the U.S. Navy (Navy Supply Detachment) global aircraft parts requisitioning systems.
