EXPERTISE & ANALYTICS IN ACTION

HEALTHCARE

Ascellon Corporation addresses challenges facing our customers in the healthcare field by developing and implementing effective solutions to overcome program integrity issues. We apply high quality standards of professionalism and expertise to support government agencies' oversight of Medicare and Medicaid programs.

PROGRAM INTEGRITY SUPPORT SERVICES

Supported by our ANSWERS® suite of automated systems, and applying the expertise of our interdisciplinary team of clinicians, analysts, and technical professionals, we are able to improve the efficiency of program integrity activities for our customers. We perform a variety of program integrity functions to help customers adhere to mandates, identify potential fraud, waste and abuse, while reducing costs, and delivering superior program results. Our services include:

- Comprehensive medical record reviews to identify utilization patterns;
- Claims review and payment analysis to identify bundling and over-coding;
- Claims and billing data mining;
- Comprehensive data analyses and predictive modeling; and
- Provider facility reviews through surveys and site visits.

PROGRAM OVERSIGHT SUPPORT SERVICES

Ascellon strengthens the oversight efforts of various governmental agencies by conducting facility surveys, evaluations requiring site visits, and compliance inspections. We draw on the expertise of our interdisciplinary teams of experts to ascertain which facilities are non-compliant with the regulations and standards that stipulate the quality of care. The services we perform include:

- Survey and inspection services for residential, acute care and non-residential health care facilities;
- Developing and monitoring of quality of care indicators;
- Preparing and completing surveys to meet Federal and State regulations;
- Preparing survey reports and performing analysis of non-compliance issues; and
- Providing Quality Assurance services that include documenting quality objectives.

SUCCESS STORIES

Ascellon utilizes ANSWERS medical review and analysis software to support CMS in identifying improper payments in the Medicare Managed Care program. Ascellon developed the system to interface with managed care encounter data and claims processing systems.

Ascellon's certified interdisciplinary teams (consisting of registered nurses, life safety code specialists, dietitians, pharmacists, physicians, social workers, safety engineers, and other experts) have conducted several thousand facility surveys over the last ten years.
